Address: Phu Dinh Ward, Ho Chi Minh City

OBJECTIVE

Full-stack developer with 3+ years of experience building high-volume financial service systems including CRM, call center automation, and document processing platforms. Experienced in Java Spring Boot microservices, ReactJS, and mobile development with Flutter, focusing on scalable backend architecture and workflow automation.

SKILLS

Programming Languages	Java, JavaScript, Python, Dart, Kotlin, Swift
Frameworks	Spring Boot, ReactJS, Flutter, Nextjs, Tailwind
Database & Cache	PostgreSQL, Redis
Others	Docker, Git, Redmine

WORK EXPERIENCE

Nov 2022 - Present **SAIGON BPO LTD**

Full Stack Developer

CRM System

Tech stack: Spring Framework, PostgreSQL, Redis, ReactJS

- Developed CRM backend services for customer management and loan recovery workflows in financial systems.
- Built REST APIs and integrated with banking systems for customer and card data synchronization.
- Optimized performance using Redis caching and asynchronous processing.
- Handled high-volume financial customer data and partner integrations.

Data Entry System

Tech stack: ReactJS, OCR, Python, Spring Framework

- Built a ReactJS data entry web application for document processing and record management.
- Implemented lazy-loaded PDF viewer to improve performance when handling large documents.
- Integrated OCR-assisted data extraction to support faster and more accurate manual data entry.

Call Center Automation System

Tech stack: Spring Framework, ActiveMQ, TTS, IVR

- Built and optimized call-center automation workflows handling 220,000+ calls per day.
- Integrated TTS and IVR automation to improve call handling and reduce drop rates.

Print & Mail Management System

Tech stack: Spring Framework, PostgreSQL, Thymeleaf, Vue.js

- Developed automated document generation and batch distribution system.
- Implemented template-based rendering and logistics integration for delivery tracking.

Mobile Field Management App

Tech stack: Kotlin, Swift, Flutter

- Developed mobile apps for field agents to capture leads, submit loans, and track visits.
- Implemented offline data capture and synchronization with CRM systems.

Jan 2022 - May 2022 **FINTECH DRACO CORPORATION**

ERP System

- Integrated company ERP APIs into a Flutter application, ensuring consistent data flow and performance.
- Delivered new features and resolved application defects based on business requirements.
- Produced technical documentation to support ongoing development and maintenance.

PROJECTS

May 2026 - Present **Box Tools Web**

boxtool.org

Built a scalable web platform using Next.js 14 (App Router), TypeScript, and Tailwind CSS. Optimized performance and SEO using dynamic imports for code splitting and Next.js SSR metadata. Developed a custom i18n system (VN/EN) via React Context, structured the architecture with modular routing for scalability, and automated deployments to Cloudflare using GitHub Actions.

EDUCATION

2018 - 2022 **Industrial University of Ho Chi Minh City (IUH)**

Software Engineering
